Ghala Bander Alsuna Allah

AI Engineer

ghala.alsunaallah@gmail.com linkedin.com/in/ghala-bander-alsuna-allah github.com/Ghala-ai-hub
+966535688999 Saudi Arabia

Professional Summary

Artificial Intelligence graduate with First Class Honors from the University of Hail, with hands-on experience in machine learning, data analysis, AI-powered applications, and intelligent system development. Skilled in Python, SQL, FastAPI, MySQL, and RAG-based solutions through academic, graduation, and cooperative training projects. Strong ability to analyze problems, build practical AI solutions, document technical work, and collaborate effectively within cross-functional teams.

Education

Bachelor of Artificial Intelligence, College of Computer Science and Engineering 2022 – 2026
University of Hail Ha'il, Saudi Arabia
First Class Honors | **GPA:** 3.907 / 4.00

Skills

Technical Skills
Programming & Data Analysis: Python, SQL, Pandas, NumPy, Excel, Google Colab
Artificial Intelligence & Machine Learning: Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, RAG, Prompt Engineering
Web, Backend & Databases: HTML, CSS, JavaScript, FastAPI, REST APIs, MySQL

Soft Skills
Problem Solving, Analytical Thinking, Teamwork, Communication

Experience

Cooperative Training 06/2025 – 01/2026
Ministry of Environment, Water and Agriculture (MEWA) Ha'il, Saudi Arabia
• Assisted with administrative tasks, report preparation, and project documentation.
• Used Microsoft Excel to organize data and update work-related reports.
• Developed Green Care Platform to support plant care by identifying plants from images and providing recommendations based on user input, location, and weather data.

Projects

CrisisTrainer – AI-Based Hospital Crisis Training System
Graduation Project
Developed an AI-powered platform that enables supervisors to create hospital emergency scenarios, assign role-based training tasks, and evaluate staff responses through automated feedback.
Tech Stack: Python, FastAPI, RAG, FAISS, MySQL, JSON, HTML, CSS, JavaScript

Green Care Platform - AI-Powered Plant Care System
Cooperative Training Project
Developed an AI-powered plant care platform that identifies plants from images and provides personalized recommendations based on user inputs, location, and weather data.
Tech Stack: Python, Machine Learning, Computer Vision, FastAPI, MySQL, Weather Data Integration

NexTraffic – AI & IoT Smart Traffic Management System
Bootcamp Project
Developed a smart traffic dashboard that monitors intersections, congestion levels, traffic signals, weather data, and alerts to support traffic management decisions.
Tech Stack: Cumulocity IoT, IoT Sensors, Real-Time Data Monitoring, Smart Alerts, Dashboard

Arabic Dhikr Chatbot – NLP Retrieval-Based Chatbot
Machine Learning Project
Developed an Arabic NLP chatbot that understands user questions and retrieves relevant Azkar from a structured dataset using similarity-based matching.
Tech Stack: Python, Google Colab, NLP, TF-IDF, Cosine Similarity

Certificates

• AWS Cloud Practitioner Pathway – Saudi Digital Academy (SDA)
• IBM Generative AI Courses – IBM / Coursera
• Google Data Analytics: Ask Questions to Make Data-Driven Decisions – Google / Coursera
• AI & IoT Bootcamp – National IT Academy (NITA)
• Machine Learning – Doroob

Languages

• Arabic
• English
