Professional Summary

Artificial Intelligence graduate with First Class Honors and hands-on experience developing machine learning, Generative AI, RAG, NLP, computer vision, and agentic AI solutions through academic, graduation, training, and SDA projects. Skilled in Python, SQL, FastAPI, MySQL, FAISS, LangChain, and backend integration, with experience in retrieval evaluation, intelligent workflows, and practical AI application development.

Education

Bachelor's Degree in Artificial Intelligence, University of Hail 2022 – 2026 | Ha'il, Saudi Arabia
College of Computer Science and Engineering
First Class Honors | GPA: 3.907 / 4.00

Skills

Technical Skills — **Programming & Data:** Python, SQL, Pandas, NumPy | **AI & Machine Learning:** Machine Learning, Deep Learning, Generative AI, Natural Language Processing (NLP), Computer Vision, Retrieval-Augmented Generation (RAG), Prompt Engineering, Agentic AI | **AI Development & Backend:** FAISS, FastAPI, REST APIs, MySQL | **Tools:** Git, GitHub, Google Colab
Soft Skills — Analytical Thinking, Problem Solving, Teamwork, Communication

Experience

Cooperative Trainee 06/2025 – 01/2026 | Ha'il, Saudi Arabia
Ministry of Environment, Water and Agriculture (MEWA)

- Developed **Green Care Platform**, an AI-powered plant care solution using **Python, Machine Learning, Computer Vision, FastAPI, and MySQL** to analyze plant images and provide personalized care recommendations based on user inputs, location, and weather data.
- Organized work-related data and prepared reports and technical documentation using **Microsoft Excel**, supporting structured project records and reporting.

Projects

RAGOps Agent – Multi-Agent Retrieval QA Optimizer, SDA Agentic AI Engineering Project

- Developed a multi-agent RAGOps system using **Python**, **FAISS**, **LangChain**, and **RAG** to monitor retrieval quality, diagnose Top-K, query mismatch, and chunking issues, and recommend targeted optimizations.
- Implemented retrieval evaluation and validation workflows to compare performance before and after optimization, supporting data-driven decision-making.

CrisisTrainer – AI-Based Hospital Crisis Training System, Graduation Project

- Developed an AI-powered hospital crisis training platform using **Python, FastAPI, MySQL, and Retrieval-Augmented Generation (RAG)** to generate emergency scenarios, assign role-based tasks, and provide automated evaluation and feedback.
- Implemented **FAISS-based semantic retrieval** to connect healthcare guidance with scenario generation, enabling context-aware AI responses.

Green Care Platform - AI-Powered Plant Care System, MEWA Co-op Training Project

- Built an AI-powered plant care solution using **Python, Machine Learning, Computer Vision, FastAPI, and MySQL** to analyze plant images and provide personalized care recommendations based on user inputs, location, and weather data.

Certifications & Training

- **Agentic AI Engineering Program –** Saudi Digital Academy (SDA) | Oct 2026
- **Data Analysis & Visualization Using Tableau —** Tuwaiq Academy | Aug 2026
- **AI & IoT Bootcamp –** National IT Academy (NITA) | Oct 2025
- **IBM Generative AI Courses** – IBM / Coursera | Aug 2025
- **AWS Cloud Practitioner Pathway** – Saudi Digital Academy (SDA) | Feb 2024
